Dear Parent,

You son or daughter should have an *I Can Fly Reading Program* workbook that we will be using in class. I will also assign pages as homework for your child, which they made need assistance with.

This program also uses online games that can be played on most devices in most browsers. I will be instructing your child to play the games for certain lessons as we progress through the program. Your child may or may not need assistance playing, but I encourage you do help them initially, until they understand how the app works.

Below are the instructions to find and access the app.

1. On the device your child will be using, go to www.ICanFlyReadingProgram.com.
2. Save the link to a shortcut or to the homepage of the device so that it can easily be found by your child.
3. Open the app and follow the instructions to get to the code activation page.
4. Chose the book you have (edition 1 or 2). The app will tell you where to look in the book for the code word. Find and enter the word.
5. Go back to the startup page by selecting the arrow in the lower left corner.
6. Select one of the slots on the right side, under "Accounts", and enter your child's name.

**Gathering the Metrics**

As your child plays the games for the lessons, metrics will be gathered. You can see the metrics chart if you select your child's name on the main page of the app. Make sure that when they play the games that their name is selected (it should be blue when selected). I will need this information to access how your child is progressing. Periodically, I will request that you take a screen shot of that page, with the metrics displayed, and email it to me.

Below is an example of a screen shot of the metrics chart.

Sincerely,

Your child’s teacher
